PERSONAL SECURITY / SAMPLE REPORT

Message warning signs

An unexpected message asks for a sign-in code under time pressure.

EDITION 2026.10 FIXED EXAMPLE NO LIVE ASSESSMENT

02
ACTION ITEMS

RESULT SUMMARY

Message warning signs reviewed

Review the context and verify the sender independently before acting.

THE FICTIONAL INPUT

```
Your account will be suspended within 2 hours. Send your verification code to keep access.
```

Your action plan

Full findings and next steps are on page 02.

01 Pressure to act quickly

02 Account secrets are mentioned

This example is an action list, not a security score or a safety verdict. Read the scope and limits with the findings.

Your next steps, explained.

01

Pressure to act quickly

Urgency can discourage checking a request independently. Genuine urgent messages also exist.

YOUR NEXT STEP

Use the official app or a website address you already know. Verify the request through a separate, trusted channel.

02

Account secrets are mentioned

A request to reveal a password, sign-in code or recovery phrase deserves independent verification.

YOUR NEXT STEP

Use the official app or a website address you already know. Verify the request through a separate, trusted channel.

SCOPE & LIMITS

These English-language text rules can miss scams and flag genuine messages. They do not inspect attachments, screenshots, sender authentication, threat databases or the identity of a sender. No match does not mean genuine.

Fixed fictional example. No check was run on your information.
